NEW APPROACHES TO STUDYING CHEMICAL AND PHYSICAL CHANGES IN THE RHIZOSPHERE

Selected papers from the Symposium organised by the Rhizosphere Working Group as part of the 16th World Congress of Soil Science, August 20–26, Montpellier, France

Guest editors: P.J. Gregory[1] and P. Hinsinger[2]
[1] *Department of Soil Science, The University of Reading, Whiteknights, Reading, UK*

Introduction vii

New approaches to studying chemical and physical changes in the rhizosphere: an overview
P.J. Gregory and P. Hinsinger 1–9

Phosphate solubilization by organic anion excretion from rice (*Oryza sativa* L.) growing in aerobic soil
G.J.D. Kirk, E.E. Santos and G.R. Findenegg 11–18

Mobilization of soil and fertilizer phosphate by cover crops
M. Kamh, W.J. Horst, F. Amer, H. Mostafa and P. Maier 19–27

Localization and quantification of net fluxes of H^+ along maize roots by combined use of pH-indicator dye videodensitometry and H^+-selective microelectrodes
C. Plassard, M. Meslem, G. Souche and B. Jaillard 29–39

Mobilization of aluminium in the rhizosphere soil solution of growing tree roots in an acidic soil
A. Göttlein, A. Heim and E. Matzner 41–49

Differentiation of soil properties related to the spatial association of wheat roots and soil macropores
A. Pierret, C.J. Moran and C.E. Pankhurst 51–58

Macropore sheath: quantification of plant root and soil macropore association
J.B. Stewart, C.J. Moran and J.T. Wood 59–67

Root:soil adhesion in the maize rhizosphere: the rheological approach
S. Czarnes, S. Hiller, A.R. Dexter, P.D. Hallett and F. Bartoli, 69–86

Physical properties of axenic maize root mucilage
D.B. Read, P.J. Gregory and A.E. Bell **87–91**

Effects of inoculation of EPS-producing *Pantoea agglomerans* on wheat rhizosphere aggregation
N. Amellal, F. Bartoli, G. Villemin, A. Talouizte and T. Heulin **93–101**

Root-induced modifications of the exchange of phosphate ion between soil solution and soil solid phase
C. Morel and P. Hinsinger **103–110**

Dynamics of phosphorus in the rhizosphere of maize and rape grown on synthetic, phosphated calcite and goethite
I. Bertrand, P. Hinsinger, B. Jaillard and J.C. Arvieu **111–119**

Root excretion of carboxylic acids and protons in phosphorus-deficient plants
G. Neumann and V. Römheld **121–130**

Root uptake and distribution of radiocaesium from contaminated soils and the enhancement of Cs adsorption in the rhizosphere
A. Guivarch, P. Hinsinger and S. Staunton **131–138**

REGULAR PAPERS

Phosphorus fractions in montane forest soils of the Cordillera de Piuchué, Chile: biogeochemical implications
S.M. Thomas, A.H. Johnson, J. Frizano, D.R. Vann, D.J. Zarin and A. Joshi **139–148**

Timing of nitrogen uptake affects winter storage and spring remobilisation of nitrogen in nectarine (*Prunus persica* var. *nectarina*) trees
M. Tagliavini, P. Millard, M. Quartieri and B. Marangoni **149–153**

Soil nitrogen dynamics and relationships with maize yields in a gliricidia–maize intercrop in Malawi
S.T. Ikerra, J.A. Maghembe, P.C. Smithson and R.J. Buresh **155–164**

The physical and chemical responses of a degraded sandy clay loam soil to cover crops in southern Nigeria
M.E. Obi **165–172**

Competition between Subterranean Clover and Rygrass for uptake of ^{15}N-labeled fertilizer
A.E. Munoz and R.W. Weaver **173–178**

Root morphological and physiological plasticity of perennial grass species and the exploitation of spatial and temporal heterogeneous nutrient patches
B. Fransen, J. Blijjenberg and H. de Kroon **179–189**

Root distributions in a *Grevillea robusta*-maize agroforestry system in semi-arid Kenya
D.M. Smith, N.A. Jackson, J.M. Roberts and C.K. Ong **191–205**

Effects of irrigation on litterfall, fine root biomass and production in a semideciduous lowland forest in Panama
J. Cavelier, S.J. Wright and J. Santamaría **207–213**

The relation between fine root density and proximity of stems in closed Douglas-fir plantations on homogenous sandy soils: implications for sampling design
A.F.M. Olsthoorn, J.M. Klap and J.H. Oude Voshaar **215–221**

Silicon absorption by wheat (*Triticum aestivum* L.)
M.M. Rafi and E. Epstein **223–230**

Premature senescence of cotton (*Gossypium hirsutum* L.) – Predominantly a potassium disorder caused by an imbalance of source and sink
P.R. Wright **231–239**

Characterisation of structural tree root architecture using 3D digitising and AMAPmod software
F. Danjon, H. Sinoquet, C. Godin, F. Colin and M. Drexhage **241–258**

Does far-red light affect growth and mycorrhizas of Scots pine seedlings grown in forest soil?
T.M. de la Rosa, T. Lehto and P.J. Aphalo **259–268**

Phosphorus (P) acquisition of cereal cultivars in the field at three levels of P fertilization
T.S. Gahoonia, N.E. Nielsen and O.B. Lyshede **269–281**

Volume contents **283–285**

Author index **286**
